

PART A: EXPLANATION NOTES AS PER FRS 134

A1 First-time adoption of Malaysian Financial Reporting Standards (“MFRS”)

These unaudited condensed consolidated interim financial statements have been prepared in accordance with MFRS 134 Interim Financial Reporting and paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad. These unaudited condensed consolidated interim financial statements also comply with IAS 34 Interim Financial Reporting issued by the International Accounting Standards Board. For the periods up to and including the year ended 31 December 2011, the Group prepared its financial statements in accordance with Financial Reporting Standards (“FRS”).

These unaudited condensed consolidated interim financial statements are the Group’s first MFRS condensed consolidated interim financial statements for part of the period covered by the Group’s first MFRS annual financial statements for the year ending 31 December 2012. MFRS 1 First-Time Adoption of Malaysian Financial Reporting Standards (“MFRS 1”) has been applied.

These explanatory notes attached to the condensed consolidated interim financial statements provide an explanation of events and transactions that are significant to the understanding of the changes in the financial position and performance of the Group since the financial year ended 31 December 2011.

In preparing its opening MFRS Statement of Financial Position as at 1 January 2011 (which is also the date of transition), the Group has adjusted the amounts previously reported in financial statements prepared in accordance with FRS. An explanation of how the transition from FRS to MFRS has affected the Group’s financial position is set out in Note A1.1 below. These notes include reconciliations of equity for comparative periods and of equity at the date of transition reported under FRS to those reported for those periods and at the date of transition under MFRS. The transition from FRS to MFRS has not had a material impact on the statement of cash flows.

A1.1 Application of MFRS 1

The audited financial statements of the Group for the year ended 31 December 2011 were prepared in accordance with FRS. Except for certain differences, the requirements under FRS and MFRS are similar. The significant accounting policies adopted in preparing these condensed consolidated interim financial statements are consistent with those of the audited financial statements for the year ended 31 December 2011 except as discussed below:

(a) Property, plant and equipment

The Group has previously adopted the transitional provisions available on the first application of the MASB Approved Accounting Standard IAS 16 (Revised) Property, Plant and Equipment which was effective for periods ending on or after 1 September 1998. By virtue of this transitional provision, the Group had recorded certain freehold land and buildings at revalued amounts but had not adopted a policy of revaluation and continued to carry those buildings on the basis of their previous revaluations subject to continuity in its depreciation policy and requirement to write down the assets to their recoverable amounts for impairment adjustments.

Prestar Resources Berhad (123066-A)
Notes to the Interim Financial Report for the period ended 31 March 2012

Upon transition to MFRS, the Group has elected to measure all its property, plant and equipment using the cost model under MFRS 116 Property, Plant and Equipment. At the date of transition to MFRS, the Group elected to regard the revalued amounts of the freehold land and buildings in 1995 as deemed cost at the date of the revaluation as these amounts were broadly comparable to fair value at that date. The revaluation surplus of RM1,016,000 (31 March 2011: RM1,007,000; 31 December 2011: RM981,000) was transferred to retained earnings on date of transition to MFRS.

(b) Foreign currency translation reserve

Under FRS, the Group recognised translation differences on foreign operations in a separate component of equity. Cumulative foreign currency translation differences for all foreign operations are deemed to be zero as at the date of transition to MFRS.

Accordingly, at date of transition to MFRS, the cumulative foreign currency translation differences of RM1,875,000 (31 March 2011: RM3,427,000; 31 December 2011: RM1,947,000) were adjusted to retained earnings.

The reconciliations of equity for comparative periods and of equity at the date of transition reported under FRS to those reported for those periods and at the date of transition under MFRS are provided below:

**Part B: ADDITIONAL INFORMATION REQUIRED BY THE LISTING REQUIREMENTS OF
BURSA SECURITIES (PART A OF APPENDIX 9B)**

B1 Review of performance of the company and its principal subsidiaries for the current quarter and financial year to date (YTD)

Group revenue and profit for the current quarter were RM132.8 million and RM0.87 million respectively. While group revenue were 1.2 % higher than the same period last year, profit for the period were lower by 77.9 % over the same period last year.

Substantial reduction in profit was mainly due to the continuous depressed selling price of our intermediary products on the backdrop of keen competition amid sluggish market demand, as a result, gross margin was squeezed though sales volume maintained about the same. On the other hand, there were some encouraging improvement in exports sales for the period under review, thus boosted the overall bottom-line performance.

B2 Material changes in the profit before taxation for the quarter reported on as compared with the immediate preceding quarter

Group revenue for the current quarter were slightly higher than the immediate preceding quarter's RM128.3 million. However, Profit before tax reduced from the immediate preceding quarter's RM2.41 million to RM 1.38 million for the quarter under review as a result of continuous weak market demand and competitive selling prices amid festive holidays during the period under review. As mentioned, above , sales margin were squeezed in order to maintain optimum level of operation and recovery of fixed overheads. There were no other material changes during the period under review.

B3 Prospects

Stress in the international financial markets has re-emerged following rising policy uncertainties and renewed concerns over the sovereign debt crisis in the euro area. Domestically, Bank Negara Malaysia had decided to maintain the Overnight Policy Rate (OPR) at 3.00 %, in view that there remain continued uncertainties emanating from the global economic and financial environment.

Against this backdrop, steel industry was not spared and sentiment remained weak and lackluster. Notwithstanding that, in line with the confidence of the government in tackling the slow economic developments coupled with the various infrastructure projects taking off soon under Economic Transforming Program, domestic demand conditions are likely to be picking up slowly and favorably. Riding on this potential development, the Board will continue to adopt cautious approach in order to generate a satisfactory performance for the rest of the financial year.

B4 Variance of actual profit from forecast profit / profit guarantee

Not applicable.

B5 Tax expenses
